EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Philip Dubios on April 29, 2004.

The application has been amended as follows:

In claim 1, line 3, delete "to"

In claim 1, line 4, insert "," after "trimmer" and delete "and" after "trimmer".

In claim 1, line 6, replace "as" with "is".

In claim 1, line 7, insert , "and" after "negative electrode"

In claim 1 line 9, insert "wt" after "40"

In claim 1, line 10, insert "wt" after "60" and insert "electrolyte" before "solution".

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a

proton conductive polymer battery comprising an electrolyte solution with a proton concentration of 5 to 40 wt% and an anion concentration of 30 to 60 wt%, wherein the anion concentration is at least higher than the proton concentration.

The prior art, such as Nishiyama et al., U.S. Patent 6,300,015, teaches a proton conductive polymer battery comprising a sulfuric acid electrolyte. The reference is silent to an electrolyte concentration comprising a proton concentration of 5 to 40 wt% and an anion concentration of 30 to 60 wt%, wherein the anion concentration is at least higher than the proton concentration. Therefore, the instant claims are patentably distinct from Nishiyama.

Conclusions

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
